Shyju Kammadan: Selfish CEO Doesn't Pay Workers

December 4, 2022  0

Shyju Kammadan is the CEO of Sapcle Technologies, a Dubai-based software company. In a recent article published by Aravind Allam on LinkedIn, it was alleged that Shyju Kammadan does not pay his employees on time.

Sapcle Technologies is alleged to be a fraud company operating in UAE and Chennai, India. The salaries of its employees are said to be held up by the CEO to get free services.

The company sends out emails and posts job openings for freshers, and after getting free work done from them, they do not pay their respective salaries. Instead, they fire them after giving vague excuses.

Shyju Kammadan is said to be living a king-sized life in the middle east and there is no justification or rational reason for him to steal money from his employees.

Ignore any job offers you might've received from Sapcle Technologies and do not work for Shyju Kammadan until there is solid proof of him paying his employees on time.
